

Product-No.: 7 1632

PHOSKADENT® SF

dental grade

Product basis	chemical product
	CAS no.: 7681-49-4 EINECS no.: 231-667-8
INCI	Sodium fluoride
Appearance	white powder
Characteristics	Content of NaF: 98,0 – 102,0% pH-value (1%): 8.0 – 12.0 Arsenic (As): max. 3 ppm Heavy metals (as Pb): max. 30 ppm Bulk density: approx. 1100 g/l Water soluble
Application	PHOSKADENT® SF is used for fluoridation of oral care products
Storage	Store in a cool, dry place. Keep away from moisture.
Packaging	25 kg PE-lined paper bags, others on request

Occupational Safety and Environmental Protection

During use and application of this product safety measures according to the safety data sheet must be ensured.

Furthermore all important information on exposure control, personal protection equipment, toxicology, ecology and waste disposal can be obtained from the safety data sheet.

This information is based on our present state of knowledge and is intended to provide general notes on our products and their uses.

It should not therefore be constructed as guaranteeing specific properties of the products described or their suitability for a particular application.

No legal liability shall be derived from it. Any existing industrial property rights must be observed. The quality of our products is guaranteed under our General Conditions of Sale.
